

Angela Victoria Fruelda

angelaavictoria@gmail.com | 0994-038-6181 | <https://anggeching.github.io/BuildTech/>

SKILLS

Programming Languages: SQL (PostgreSQL), Python (Pandas, NumPy), JavaScript
Database Tools: Snowflake, MySQL
Processing Tools: Databricks
Web Development: HTML, CSS, Bootstrap
Tools & Environments: Git, VS Code, Postman

WORK EXPERIENCE

Taisei Electronics Philippines (January 2025 – June 2025)

Data Developer Support Intern | Technologies Used: Python Pandas, SQL Queries, MySQL, Flask, ETL pipelines

- Collaborated with stakeholders to gather software requirements for an ERP subsystem, enhancing process understanding.
- Engineered data pipelines using Python (Pandas) within a Flask application, streamlining data cleaning and aggregation.
- Managed database for backend processing, ensuring reliable data storage and retrieval.
- Successfully migrated critical data from Excel-based systems to a relational database (MySQL) using advanced SQL queries.

EDUCATION

University of Batangas Lipa City | Batangas, Philippines

Bachelor of Science in Computer Engineering (Aug 2021 – Jul 2025)

- Honor: Cum Laude (General Weighted Average: 1.51)

St. Augustine Academy of Pampanga | Pampanga, Philippines

Academic Track: Science, Technology, Engineering, and Mathematics (STEM)

- Honor: With High Honor (General Weighted Average: 95)

CERTIFICATIONS

- Data Engineer Associate | Datacamp (Jun 2025)
- SQL Associate | Datacamp (Jun 2025)
- Advanced SQL | Kaggle, a Google subsidiary (May 2025)

PROJECTS & EXTRACURRICULARS

Best Paper and Best Thesis Presenter of College of Engineering and Architecture Department

Issued by: University of Batangas Lipa City, June 2025

1st Runner Up Digital Electronics Breadboarding Regional Competition

Issued by: ICpEP (Institute of Computer Engineers of the Philippines), December 2024

- Collaborated with a partner to analyze and solve digital electronics problems under strict time constraints.
- Interpreted schematics to create clear and accurate breadboard layouts.
- Designed and implemented logic circuits using gates (AND, OR, NOT) to address decision-making processes based on multiple inputs.

Visionbot (Dec 2024)

Technologies Used: Python, Roboflow, YOLOv8, Streamlit, LM Studio, Anaconda

- Developed a dynamic website combining real-time object detection with conversational AI.
- Integrated YOLOv8 with Streamlit to build an interactive web application.
- Implemented local Large Language Model (LLM) responses using LM Studio Inference Server.
- Check Project Demo here: https://drive.google.com/file/d/1ZmW1NGMcfEYOIWeJ5Yx4Q3m8TBiYMknD/view?usp=drive_link

Dynamic Home Automation System (August 2024)

Technology Used: HTML, CSS, PHP, Python, C++, Arduino, MySQL

- Designed a system to manage and monitor devices across different room in house miniature in real-time.
- Implemented HTTP requests for seamless device state updates and interactive visual elements.
- Check Project Demo here: <https://drive.google.com/file/d/1uXxzJsfJWVAfc8sHE5HRdbppHAdBOLX1/view?usp=sharing>
